Unite For Sight is a 501(c)(3) non-profit organization that empowers communities worldwide to improve eye health and eliminate preventable blindness. Volunteer Teams work with partner eye clinics to provide eye care and eye health education programs to medically underserved communities. Additionally,

volunteers work in ninety chapters established at universities, medical schools, corporations, high schools, and in communities throughout the world.

Internationally, Unite For Sight's volunteers range from students, nurses, and public health professionals to optometrists and ophthalmologists.

The volunteers serve as interns at eye clinics. The eye clinic's eye doctors and Unite For Sight volunteers jointly participate in community-based screening programs. The clinic's eye doctors diagnose and treat eye disease in the field, and surgical patients are brought to the eye clinic for surgery. Unite For Sight funds the surgeries for those patients unable to afford eye care. This partnership between Unite For Sight volunteers and eye clinics reduces the financial, transportation, and education barriers to eye care. Unite For Sight's model also reduces costs and expands the ability of all people to "Unite For Sight" and help in the fight against blindness.

“It is a great pleasure to work with Unite For Sight in Ghana to achieve the goals of Vision2020. Unite For Sight’s high quality programs are very very useful and greatly valued in Ghana. Unite For Sight has touched the lives of so many people in Ghana and reduced the suffering of mankind. A continuation of the program is very much welcome as many people now see them as a symbol of hope.”

"So many people tell me to thank you and your family each day for the help you have given by giving sight to the poor. Our desire to serve and poor patients desire to see would not have been possible without the help and support of Unite For Sight."

– Dr. Ajit Sinha, MBBS, MS, MRCOphth, Director, A.B. Eye Institute; President, All India Ophthalmological Society

"When told about the volunteers and Unite For Sight who brought eyeglasses, everyone was blessing those "angels" who brought back their valuable vision to life again. After the huge success of our programme in presence of all 5 volunteers, there was demand for many other small villages and towns for the similar eye camps"

– Dr. Ujjwal, MBBS, Medicovet, Government Medical College and Hospital, Nagpur, India

We hope to see you next year at Unite For Sight's Fourth Annual International Conference on April 14-15, 2007, at Stanford University, Palo Alto, California.

“Tamale has a population of about 2,033,462 with only one Ophthalmologist taking care of their eye care needs. The Unite for Sight Program has come to reduce the burden, not only for the patient but also for the Ophthalmologist who, sometimes has to stay for two months without performing any eye surgery just because the patients cannot pay \$35 to get their cataract removed. The financial constraint on the part of patients endangered the universal concept of vision 2020 – the right to sight for all people. It is in this regard that the Unite for Sight program for the Northern Region of Ghana is great news for the ophthalmologist, the people of Tamale and Northern Region and the Ghana Health Service since it gives us some sort of hope of getting closer to giving sight to all the people of Northern Region and Ghana as a whole by the year 2020. Unite for Sight has well trained volunteers who also come to reduce the burden of the few ophthalmic staff by rendering high quality eye care services in the clinic and outreach screening exercises in the communities in and around Tamale. I therefore wish the entire management and volunteers of Unite for Sight success And God’s blessing for their service to humanity.”

– Dr. Seth Wanye, MD, Ophthalmologist, The Eye Clinic of the Tamale Teaching Hospital, Ghana
