Rehema Afya Bora’s Clinics

Creating Thriving Communities in Tanzania’s Most Remote Areas

Dr. Sameer Moulali, MD
Social Impact Labs at Yale University, GHIC Innovation Conference
April 14, 2018
The Problem

• 70% of Tanzanians live in rural villages, of which 83% have no access to health care

• What is causing this problem?
  • Poverty:
    • 70% of Tanzanians live with less than $2 per day
    • 80% of them live in rural areas
  • Doctor shortage:
    • Only 0.31 doctors / 10,000 population in rural areas
  • Lack of infrastructure:
    • Vast distances and un-developed roads
Rehema’s Solution: An Integrated Operating Model

Solar infrastructure = cost efficiency

1. Solar & Agri-Infrastructure Clinic
2. Local Health Care / Agri-Op Team
3. Agri-Products used in-house or sold locally

Revenues sustain clinic ops and salaries

Addresses factors for overall community health and well-being:
- ✓ Health Care
- ✓ Food Security
- ✓ Clean Water
- ✓ Energy
- ✓ Local Employment
Rehema’s Solution is Evidence-Based

• Clinical Officers and Medical Assistants practice in rural settings
• 95% of community performs agriculture
• Local partner: Agriprenuer Africa
• Successful Test Pilot: Krishna Veni Charity Clinic
  • Small scale agri-ops
  • Low-cost health care
  • 1200 – 1400 locals helped / yr
Rehema's Integrated Operating Model will Generate these Outcomes in Year One per Clinic

- **Birthing Centre of Choice**
  - Reduction in maternal and new born deaths

- **Centre of excellence in treatment & education**
  - Reduction in treatable or preventable illnesses

- **Community Kitchen of choice**
  - Reduction of illness due to food or water borne contamination

Data collection: implementation and training on a records management system
Rehema is Seeking Funding Support to Implement the Integrated Operating Model

• Upgrade the Krishna Veni Clinic
• Complete construction of abandoned clinic in Nyamato district
• Both projects are underway:
  • Funded by Dr. Sameer and Ms. Nida Jabrani
  • Management oversight: Dr. Sameer
  • Agri-Doc at Krishna Veni: Dr. Mtango
  • On-ground support in Nyamato: Dr. Mtango
Thank You!
